

Monthly Donation Program

Overview:

The Monthly donation program objective is to get money that OMP can work with and scale with. In this program we will give donors the possibility to donate each month and to get a tax receipt automatically. The program encourages donors to move up the tires ladder.

Big part of this program is to “feed” the openskills platform by having a regular money flow and engagement from the monthly donators.

10% of the monthly donations will go into a piggy bank where the donors will vote on which project will get a monthly money boost.

10% additionally (after the first 10% were redacted) will be used for projects our shareholders can vote on and will be uploaded as a campaign to the platform.

For example:

Environment projects - bio diesel tree planting, educational parks, environment awareness...

Village improvement - repairing infrastructure in rural villages, subsidizing tools for farmers....

Education - Aiding school, scholarships, building computer classrooms, building regular classrooms

Subject: In order to have a real impact. We need your help!

Hi [Name],

For 25 years Openmindsprojects elevated underprivileged youth all over Thailand, with the support and under the influence of foreign sponsors, who don't know the communities' actual needs. But with your donation, we can change the equation.

With your monthly donation, through our [fundraising site](#), OpenmindProjects can gain independence and create initiatives with a real grassroots impact, addressing the real needs of the rural communities and people, by the people who live in those communities.

In our new direction we are looking to help rural communities to take a part in the \$45 billion tourism industry, an industry which is controlled by foreign groups and companies which take a large percentage of it back to Europe and the US, through 3 main initiatives:

Train The Trainer camp - A 3-month on-site program where we equip a group of talented youth, with highly important tools. Those trainers will help us with our other camps and initiatives.

Tourism Innovation Hub - A hands-on innovation programme that equips youth from underprivileged areas of Thailand with the essential skills needed to create tourism initiatives.

Openmind.Travel - A platform that helps people organize meaningful travel experiences in rural communities while giving visibility to local community tourism

initiatives. And, we will offer organized tours in those communities that allow visitors to actively experience local life, involving graduates from our previous camps. Helping them to get practical experience in tourism.

Thank you for considering how you can further support our mission. Your generosity is truly appreciated and makes a difference in the lives of those we serve.
